## Guide to Photographic Commissions

- Specification:** Photographs are shot on a high-end "medium-format" digital camera, which has a maximum capture size of 22 megapixels, and supplied in retouched form on CD.
- General Shot: £150 - £175** Photographs that require a lot of time waiting for or creating ideal conditions, e.g. shot of the whole building exterior, requiring a good sky, sun in the right direction, and clear foreground; an interior requiring rearrangement of furniture; any shot that requires out of hours working or the inclusion of several people.
- Intermediate Shot: £125** Similar to a general shot, not as time-consuming.
- Detail Shot: £100** Photograph that does not rely on finding ideal conditions, e.g. external shot with little sky or foreground, or part of an interior requiring minimal arrangement and lighting.
- Retouching:** Most retouching and montage is included in the price structure outlined above, but where significant post-production work is required, additional charges may apply (usually an extra £15-25 per shot).
- Travel:** Commissions outside the Glasgow area are subject to a supplement that will be quoted in advance.
- Joint Commissions:** A percentage supplement is charged for joint commissions. This is normally 15% for one extra party and 25% for two or more extra parties. Each party receives their own materials and licence.
- Prints:** Digital "Durst Lambda" or "Fuji Frontier" prints can be supplied framed or unframed.
- Copyright:** Commissions include an unrestricted reproduction licence for clients to use their images as they please. Full copyright is retained, however, so images may not be sold or gifted to a third party.
